Version 7.1.4.1287   14/04/2011

Below is a list of features/bugs that have been dealt with in this version

1. Billing –new module
2. New printing system (+different location)
   All document templates, reports and labels now assigned a paper size (format) rather than a printer. Printer is defined in menu file/print setup to a paper format
3. Printing of trends and cube analysis now easy
4. Appointments
   Search for first available slot
   Time blocks can be recurring
5. Dictionaries
   Hide an item
   Define a synonym for an item
6. Interactive views and Note bene
   New interactive view like the old Note Bene but you can enter data directly from the view
   Quick view from the selector. Simply hit F3 from the selector
   Conditional interactive views. COPD/diabetes only pop up for relevant patients
7. Mediforms
   CHAD2 score for Atrial Fib   **http://www.mdcalc.com/chads2**
   Wells Criteria for DVT
   Wells Criteria for pulmonary embolism
8. Cancer referrals
   Available for Lung, Breast and prostate
   Check tools/options/cancer referrals – Requires names and passwords from health link
9. Drug Module
   Repeats can be prescribed as generic
   Note: Ctrl_N to directly prescribe instead of Alt_P
10. Shift Ctrl_H
    Extra options to filter the search
11. Query Plus -Can now use ICPC codes to query
    Query Plus Data extraction configuration
12. Merging HCrs
    Now merges the admin transaction also. Items in green will be kept
13. Template –create HCR anal wizard
14. Tools menu
    Duplicate patients – tools => duplicates - searches for duplicate HCRs.
    These HCRs can then be merged
    Check GMS number on line
15. Audit trail
    New button in patient file medical side to display who did what and when with this HCR
