7.2.2.1399 on 23/01/2012

History of recent releases

- Version 7.1.5.1287 was released on the 14/04/2011 - New billing released
- Version 7.1.5.1292 was released 22/04/2011
- Version 7.1.6.304   was released on the 16/05/2010
- Version 7.1.7.1320   was released on the 26/06/2011
- Version 7.1.7.1348   was released on the 27/09/2011

Version 7.2.2.1399   23/01/2012

1. **GMS validation for all patients**
   See under tools ➔ GMS/Duplicate manager
   See document "GMS_Validation.doc"
2. **Billing**
   - Can now convert single HCR from old billing view in billing tab (F8 to see old bills)
   - Billing conversion problem if large number of bills to be converted (eg 70,000)
     Use HoHCREdit tool.exe to "undo billing" – using hdmp expert. Don't undo but use the option (See separate document "BillingConversion_Fix .docx")
   - Billing Queries: Quotes ["] as invoice amount in Third party bills – Solved if user has SQL 2005 or higher
   - Billing Balance displays correctly in Queries based on option to exclude 3rd party amounts
   - Billing – Add invoice to lock file if transaction locked = done
   a) Doctor adds an invoice, Billing autosaves the transaction, the doctor edits the transaction again to complete the medical part
   b) Patient goes to the secretary to pay the invoice.
   c) the secretary goes in the billing tab (from patient selector (Shift+F9), Rdv or from the patient file (billing tab) and uses the payment dialog to record the payment
   d) no lock but the secretary gets a message : "Modifications saved in a temporary file…"   *(the balance is not yet correct)*
   e) when the doctor saves the transaction, the payment is added as a new version of the transaction to the medical part.
      => no lock and data recorded. *(balance is now correct)*

3. **External Devices**
   a) Cardioview 5 – Health one now integrates the Biolog ECG using the new cardioview software
      - Install Cardioview5
      - Open configuration tool ➔ file/open/external devices (Ctrl_Alt_E)
      - Click on tools ➔ import configuration file
      - Browse to Honewin\temp and double click the file "Spiro_Cardio5.xml"

   b) WinSpiro software version 4.2. Updated software from "MIR" spirometer device.
      Health one now integrates the spirometry data for this software with better spirometry data management

4. **Cancer referrals** –
   Interface has been improved
5. **National referral form**
   General referral can be used as a stand-alone general referral. To enable this go to
   Tools/Options/Healthlink referrals/ and tick "work off line"

   Activate Healthlink Referrals
   ☑ Standard Referral ⟷ ☑ Work Offline
   ☐ Breast Cancer Referral
   ☐ Lung Cancer Referral
   ☐ Prostate Cancer Referral

6. **National Referral template**
   This is a normal Health one template that can also be used as a new quicklet and has been
   agreed with the GPIT as a National Template
   Note: you cna use either the referral form or the template; they are both designed to be suitable
   standard general referral letters

7. **Query Plus**
   * GMS number – can now refine the search directly to GMS patients only/PP only
   * Can now search for list of patients whose **last** value is eg cholesterol > 7. (SQL 2005+ only)
   * Extraction – better layout and fix some bugs
8. **Mediforms –**several new mediforms
   * Child weight study – 3 mediforms relate to this
   * BloodPressure form which adds a comment to the readings
9. **Bugs**
   User Db – Importing an HCU to a profile that doesn't exist – now allowed
