

“From the Cradle to the Grave”

Have we lost touch with the basic ability of HealthOne. Do we need to be reminded how much functionality can be packed into one Practice Software Programme. The answer is more than likely **YES** for most of us. The optimum Practice Software Programme needs to be able to:

- Take information easily
- Hold information successfully
- Extract any information easily which has been uploaded.
- Provide a way of analyzing the information to give accurate, up to date statistics on a practice population
- Be flexible enough to provide any level of user with all the above functions.

This will certainly be the focus of our AGM this year. We are constantly ‘showcasing’ the new functions of the programme, but often we need to re-acquaint ourselves with the more basic features of HealthOne.

All HealthOne users are welcome to attend the workshops, and there is no registration fee for attending the workshops only

We will have 3 rooms in full use. You will be assigned a room when registering in the morning. We would ask that you remain in the same room for the duration of the day. Speakers will rotate and speak to each group.

There is a 4th room and this will be designated to provide any one-to-one support issues you may have on the day. This will be run and co-ordinated by Helix Support & Michael Joyce

A G E N D A

Saturday 23rd November 2013

09:15 – 10am Registration (Pavillion)

10am – 10:15am Chairmans Welcome and Address (Pavillion)
